To Whom It May Concern:

The American Heart Association appreciates its partnership with Hip Hop Kidz. Over the past 6 years, we have developed a strong relationship with Hip Hop Kidz and they have become a valuable part of the Miami-Dade, Broward and Palm Beach County Heart Walks. They are considered the "unofficial" dance troop for the American Heart Association!

Hip Hop Kidz contributes year after year, at the Heart Walks, the American Heart Association's largest fundraiser. Over six to seven thousand employees, sponsors, and individuals of the community come together for this great event and have the opportunity to see the Hip Hop Kidz perform. They truly celebrate the mission to fight heart disease and stroke.

Together we are saving lives and making a difference in our community- in fact we are Changing Tomorrow. Today.

Again, we would greatly appreciate the support of Hip Hop Kidz, and if you have any further questions do not hesitate to contact Jessica Irish at (954) 772-8100 or jessica.irish@heart.org. Thank you!

Organizational Information:

You probably know that cardiovascular disease is the leading cause of death in this nation. But did you know that it claims more lives than cancer and AIDS combined? Every year, 960,000 people die from heart disease & stroke. Furthermore, over 250,000 of these people die from sudden cardiac arrest. Across the country, 1 in 4 people will be affected by cardiovascular disease. This includes 1 out of every 100 children.

Someone once said that it takes a moment to meet someone, minutes to get to know them, days to love them, and a lifetime to forget them.

Respectfully,

A handwritten signature in blue ink that reads "Allison Jewell".

Allison Jewell
Executive Director
American Heart Association
